

Hai-Nguyen (Hann) Nguyen

Ph.D., Mechanical Engineering

*Aerial Robotics Lab,
Imperial College, UK
✉ hann@ieee.org
http://hann.work*

Summary

Demonstrated working history in top research institutions in Vietnam, Korea, and UK. Strong research professional in controls and robotics with works published in top-tier journals/conferences and featured in media. Proficient in C++ and Matlab. Hand-on experience in developing robotic prototypes.

Education

- Feb. 2018 **Ph.D. Mechanical Engineering**, *Seoul National University*, Korea.
Thesis: Dynamics and Control of Quadrotor-based Aerial Manipulation Systems.
Committee: Prof. Frank C. Park (chair), Prof. Dongjun Lee (advisor), Prof. Kyujin Cho, Prof. Hyosung Ahn, and Prof. Kyungsoo Kim.
- Jun. 2008, **B.Eng. Mechatronics, M.Sc. Engineering Mechanics**, *Hanoi University of Science and Technology*, Vietnam.
Jan. 2011

Research Experience

- Apr. 2018 – **Research Associate**, *Imperial College London*, United Kingdom.
Present Working in Aerial Robotics Laboratory (ARL). Developing control and planning algorithms for aerial robotic systems in physical interaction with environment.
- Sep. 2012 – **Graduate Researcher**, *Seoul National University*, Korea.
Feb. 2018 Worked in Interactive & Networked Robotics Laboratory (INRoL).
 - Developed a novel aerial platform (SmQ platform) to overcome the well-known issues of under-actuation of multi-rotor drones for aerial operation/manipulation. Provided theoretical framework for its modeling and control, combining high-level Lyapunov control design (to achieve trajectory tracking) with low-level constrained optimization (to comply with physical constraints) ([IROS15](#), [TRO18](#), [IEEE Spectrum](#), [Interesting Engineering](#)).
 - Designed a control framework to enable a quadrotor to operate a tool attached on it. Fully characterized the internal dynamics of the spatial quadrotor tool operation, which arises due to the under-actuation of the quadrotor ([IROS13](#), [Automatica15](#)).
 - Collaborated with Rodel Lab at SNU and developed a new control decode scheme for their underwater robot with tilting thrusters ([IJCAS17](#)).
- Sep. 2009 – **Permanent Researcher**, *Vietnam Academy of Science and Technology*, Vietnam.
Aug. 2012 Joined Department of Mechatronics, Institute of Mechanics in Sep. 2009 and became permanent researcher from Mar. 2010. Co-developed software/hardware for a 6-DOF manipulator prototype for welding.
- Dec. 2007 – **Graduate Researcher**, *Hanoi University of Science and Technology*, Vietnam.
Aug. 2009 Studied at Department of Applied Mechanics. Developed an algorithm for generating symbolic models of tree-topology multibody systems and a formalism for multibody systems using null-space of Jacobian matrix.

Skills

- Coding C++/Python, Matlab/Maple/Processing, ROS.
- Hardware Quadrotors (AscTec, Pixhawk), 6-DOF manipulator (prototype), Haptic devices (Phantom, Force Dimension), Motion capture systems, MCUs (Arduino, Odroid).

Honors and Awards

- 2018 Outstanding Contribution in Reviewing, Mechatronics Journal, Elsevier.
- 2017 Best Video Award, Korea Robotics Society Annual Conference.
- 2015 Travel Award, IEEE/RSJ International Conference on Intelligent Robots & Systems.
- 2013 – 2015 Lecture & Research Scholarship, Seoul National University.
- 2013 Global Scholarship, Seoul National University.
- 2012 – 2016 BK Scholarship, Brain Korea 21 & 21 Plus Program, Korea Government.
- 2010, 2011 Exceptional Researcher (Stakhanovite Appellation), Institute of Mechanics.
- 2003 Merit-based Scholarship, Hanoi University of Science and Technology.
- 2002 First Prize in Physics, Annual Excellent Student Contest, Haiphong City.
- 2001 Third Prize in Biology, Annual Excellent Student Contest, Haiphong City.

Media

- 2017 Interesting Engineering, IEEE Spectrum.
- 2015 IEEE Spectrum.

Patents

- [1] D. J. Lee, **H. Nguyen** and H. Lee, "Aerial robot system based on multi-rotor for mechanical tasks," *Korea Patent No. 10-1614620-0000*, 2016.
- [2] D. J. Lee, **H. Nguyen** and S. Park, "Multi-link type working apparatus moved by thrust generating device," *US Patent Application No. 14/923,442*, 2015.
- [3] D. J. Lee, **H. Nguyen** and S. Park, "Multi-link type working apparatus moved by thrust generating device," *Korea Patent Application No. 10-2015-0024404*, 2015.

Peer Review

- Journals IEEE Transactions on Robotics (2015, 2016, 2017), IEEE Robotics and Automation Letters (2017, 2018), Mechatronics (2017, 2018), Nonlinear Dynamics (2017).
- Conferences IEEE Int'l Conference on Robotics & Automation (2015, 2016, 2017, 2018), IEEE/RSJ Int'l Conference on Intelligent Robots & Systems (2014, 2016, 2018).

Teaching Experience

- Sep. 2013 – **Teaching Assistant**, *Seoul National University*, Korea.
- Jul. 2017 (1) Control System I (Spring 2015, Spring 2016, Spring 2017).
(2) Control System II (Fall 2013, Fall 2014, Fall 2016).
(3) Robot Mechanics (Spring 2014, Spring 2016).
