

Call for Research Associate/PhD Applications in Robot Motion Learning and Control

RMIT University, in collaboration with the University of Liverpool, invites applications for a Research Associate or PhD student to join our cutting-edge research on Robot Motion Learning and Control. The successful candidate will work at the intersection of robotics, AI, and control systems, developing scalable and explainable models that enable robots - particularly humanoids, drones, and complex manipulators - to learn, adapt, and perform coordinated motion in dynamic environments. The project focuses on advancing motion learning and control for robotics that combine perception, control, and reasoning, supporting applications in sustainability, disaster response, and human-robot collaboration.

Applicants should have a strong background in robotics, machine learning, or control systems, with experience in deep learning frameworks (e.g., PyTorch). Prior experience in robot motion learning, simulation environments (e.g., Isaac Gym, MuJoCo, PyBullet), or reinforcement and imitation learning is a plus. This position offers opportunities to collaborate with leading international partners and contribute to high-impact research publications in top-tier venues such as ICRA, IROS, CVPR, and NeurIPS.

For the Research Associate position, applicants should hold a Bachelor's or Master's degree in a STEM discipline. For the PhD position, applicants must demonstrate English proficiency with an IELTS score of 6.5 or equivalent. Both positions offer a competitive salary, commensurate with the candidate's experience, and include a travel budget of up to USD 5,000 to support participation and presentation at leading international conferences.

Successful candidates will be co-supervised by faculty members from RMIT University and the University of Liverpool. The PhD research will be primarily conducted at RMIT Vietnam, with planned research visits to RMIT Australia and the University of Liverpool, UK.

Academic advisors

Dr. Hai-Nguyen Nguyen
Lecturer in Robotics & Mechatronics
School of Science, Engineering & Technology
RMIT Vietnam, Saigon South Campus, Vietnam

How to apply

Candidates should send a detailed CV along with a motivation letter to Dr. Hai-Nguyen Nguyen (hainguyen.nguyen@rmit.edu.vn) and Dr. Anh Nguyen (anh.nguyen@liverpool.ac.uk). Applications will be reviewed in a rolling basis.
